Beautify Your Garden with the World's Finest Roses

FALL 1954 • SPRING 1955

Our rose bushes are all good, healthy, field grown. Each bush is labeled true to name. If any prove not true, we will gladly replace them.

All but a few varieties of our rosebushes are budded on Odorata root stock. From tests conducted in many sections of the country, this root stock has proven the best, as hybrid-tea varieties budded on it outgrow and live longer than any other root stocks. We grow all the rosebushes offered for sale in this catalog in our nursery at Stockton. We also exercise the greatest care in digging, packing and shipping so that they get to you in the best condition.

We will replace any bushes that you receive from us that were damaged in shipping if notified within ten days, but do not replace good bushes that are planted and do not grow as there are too many soil and climatic conditions that we have no control over.

The first spring after planting rosebushes, only remove old flowers, leaving all stems and leaves possible.

All our rose bushes, if given proper care, will bloom for you the first Spring and will continue all Summer and Fall. Climbing roses bloom very little the first year, but will be covered with bloom the second Spring.

When Ordering by Mail Read Carefully

Please mention if you want us to substitute, in case we are out of some varieties that you ordered. If so, give names of a few varieties that you prefer.

Send your order early so as to get all the varieties that you want. Please send cash, check or money order with order. No C.O.D. orders accepted. We ship no orders amounting to less than \$3.00.

We begin shipping rosebushes December 1st, and stop February 15. At our nursery we can supply rosebushes in gallon cans during the summer, but we do not ship these.

Open daily including Sunday but closed on New Years Day, Easter Sunday, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day and Christmas Day.
